HECTARES AVAILABLE	ECOLOGICAL ZONES	COMMUNITY WARDS	COMMUNITIES REPRESENTED

The Opportunity

Laisamis Constituency offers **1.85 million hectares of community-governed ASAL land** across four ecological zones — available as a structured climate technology testbed. ASAL regions cover 80% of Kenya and 40% of sub-Saharan Africa. Technology proven here is technology proven for one of the world's largest underserved markets.

What We Provide

- **Land access** — 1.85M ha, 4 ecological zones
- **Community consent** — NLC-witnessed resolutions
- **Legal structure** — Community Land Act 2016
- **Local workforce** — Trained field monitors
- **Ecological diversity** — Highland to extreme desert
- **Scale** — Multi-site simultaneous pilots
- **Political backing** — MP and Governor as conveners
- **Institutional anchor** — NLC constitutional oversight

Four Ecological Zones

- **Zone II — Highland Forest** · Mt. Kulal, 1,000mm rainfall, 2,066m altitude. UNESCO Biosphere Reserve.
- **Zone IV — Semi-Arid Mid-Slopes** · Soil carbon, agri-climate data, solar irrigation. Restoration technology.
- **Zone V/VI — Arid Bushed Grassland** · 300–900m. Primary testbed. Solar, water harvesting, remote sensing.
- **Chalbi/Kaisut Desert** · Highest solar irradiance in East Africa. Atmospheric water technology conditions.

"The same geography that hosts Africa's largest wind power project — 690MW at Lake Turkana — is available for your climate technology pilots."

Technology Domains Sought

- Solar irrigation and off-grid energy systems
- Soil sensing and carbon measurement
- Satellite and remote sensing validation
- Atmospheric water harvesting
- Rangeland monitoring and restoration
- Agri-climate data and forecasting

Governance Structure

Anchored by the **National Land Commission (NLC)** under Article 67 of the Constitution. 9 formal forums completed across all 6 wards, 2024–2025. Community Land Trust being established with elected ward trustees. Politicians serve as conveners only — governance authority rests entirely with the NLC and Community Land Trust.

■ **Legal Note:** ~173,700 hectares subject to an active High Court case are excluded from any commitment until resolved. All agreements use only undisputed, NLC-registered land.

About the Initiative Lead

Hamed Nalle — Founder & Lead, Laisamis Climate & Land Initiative Born and raised in Laisamis. Son of the late Ntepesi Nalle, respected community leader. Works through the Feyiyah Action Network (FAN) and Marsabit Youth Reform Program. **Email:** hamednalle@laisamisclimate.co.ke **Phone/WhatsApp:** +254 706 594 510 **Website:** laisamisclimate.co.ke

Contact Hamed Nalle for land classification data, NLC engagement records, and proposed partnership framework.
